

# PREFACE

---

**We** would like to thank all the authors for your contributions and all users for your continuous support with the hard working NSRRC staff. Without your in time contribution we could not publish 2007/2008 Activity Report in July, which is two months before our usual schedule. In return, our staff has maintained the scheduled user beam time with the record of 98.1 percent for the up time and the beam stability index better than 0.2 percent for 98 percentage of user beam time while running in top-up mode.

In the future, we will enlarge our research in life science and nano science and put great emphasis on the fields of our strength, such as magnetism and material science. We hope through great cooperation and excellent teamwork with universities & industries, we will reach the best light source service to our users and upgrade the quality of the research.

We are looking forward to a bright future of Taiwan's Light Source.
