三、內容摘要：

- 參加會議的項目或考察、研究訓練的主題

It was the meeting for reporting on our work. And discusses our future tasks with the relevant managers.

After the meeting, I utilize the chance to visit some colleagues to discuss the chance of the collaborations.

四、心得概述與建議

- 參加會議或考察設施、研究訓練的收穫

The meeting was very efficiency; we reported on our works done in these years and the future perspective to the managers. It gives us the direct chance to face them to do the communication. We got the direct instructions from top managers in the meeting and learn what we need to note in the future.

I am very impressed that the managers aware the situations of Australia and taking care of us. I learned the rearrangement of the neutron group and knew my role in the Taiwan team and what to focus on in the coming year.
